### FOR IMMEDIATE RELEASE

### QuoteWerks Releases New PDF Generator in Build 50

***Build 50 includes 12 new features highlighted by the compatibility with Windows 7 and a new PDF generator.***

ORLANDO, FL (PRWEB) November 2, 2009 — Aspire Technologies, Inc., a leading provider of sales quoting software solutions for the global small and mid-markets, announced today the latest build of QuoteWerks sales quoting software (Build 50) is now available for download and purchase.

Build 50 includes new features designed to enhance the user's ability to create quotes and proposals quickly and accurately. The most notable feature is the new PDF generator. The new and improved PDF generator no longer requires that a printer driver be installed and alleviates the inconvenience and complexity of installing these drivers. Organizations often set user restrictions which limit the ability for drivers or new software to be installed by non-administrators. Although this is a helpful security setting, installing required drivers for software becomes increasingly difficult and user rights usually need to be modified to allow the install to continue. Utilizing a PDF generator that does not install drivers not only eliminates this issue, but it also allows the CPU to operate without another process running too.

Additionally, the new PDF generator includes the ability to flag PDF's as Read-only. This option can also be enhanced to prevent the recipient of the file from copying text out of the PDF. Organizations can use this feature to make it more difficult for customers or prospective customers to alter the quote. Furthermore, users can now embed fonts into the PDF making the file even more tamper-resistant since only the characters embedded in the file are used which also reduces the size of the document.

Coupled with the above features, users can also activate the option to have the PDF generator automatically detect hyperlinks in the PDF file. This option will underline and color the link blue and allow the hyperlink to be clicked.

By installing this new build, users will find that QuoteWerks is now completely compatible with Windows 7. The previous PDF generator used by QuoteWerks was not compatible with Windows 7.

"With the release of Windows 7 it is very important to offer our customers a solution that functions seamlessly with it as well as previous versions of Windows. Currently, QuoteWerks is 100% compatible with Windows 7 and the new PDF generator expands the functionality users can implement to ensure their quotes are accurate," says President of Aspire Technologies, Inc. John C Lewe IV.

The new PDF generator and compatibility to Windows 7 is available in Build 50 or higher of QuoteWerks version 4.0. Visit <http://www.quotewerks.com/updates/UpdateAgent.asp> to download build 50.
